Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8, 19-26, 28-33, and 36-37 a product (nucleic acid, and corresponding vectors and host cells), and a method of using said product (a method of detecting a mutation and corresponding kit).

Group II, claim(s) 9-11, drawn to a protein.

Group III, claim(s) 12-13, drawn to an antibody.

Group IV, claim(s) 14-18, and 27 drawn to a method of detecting menin in a human cell or tissue sample and corresponding kit.

Group V, claim(s) 34 and 35, drawn to an organism.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The special technical feature of Group I appears to be a nucleic acid.

The special technical feature of Group I appears to be a protein.

Art Unit: 1642

The special technical feature of Group I appears to be an antibody.

The special technical feature of Group I appears to be a method of detecting a protein.

Therefore these inventions are distinct and do not relate to the same inventive concept.

Nucleic acids, proteins, and antibodies are entirely different structures, having differing chemical make up and biological functions. The method of Group IV is distinct from the products of Groups I-III because it is entirely different from the method in Group I, and because it's special technical feature is different from those products.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jennifer Nichols, whose telephone number is (703) 308-7548. The examiner can normally be reached Monday through Thursday 6:30am to 5:00pm.

Art Unit: 1642

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anthony Caputa can be reached at (703) 308-3995. The fax number for the group is (703) 305-3014 or (703) 308-4242.

Communications via internet e-mail regarding this application, other than those under 35 U.S.C. 132 or which otherwise require a signature, may be used by the applicant and should be addressed to [anthony.caputa@uspto.gov].

All internet e-mail communications will be made of record in the application file. PTO employees do not engage in Internet communications where there exists the possibility that sensitive information could be identified or exchanged unless the record includes a properly signed express waiver of the confidentiality requirements of U.S.C. 122. This is more clearly set forth in the Interim Internet Usage Policy published in the Official Gazette of the Patent and Trademark on February 25, 1997 at 1195 OG 89.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the group receptionist, whose telephone number is (703) 308-0196.
